Programme description The two-year MSc programme in Advanced Power Engineering is designed to train power engineers in the most current developments in the field, and help them develop fundamental and applied research skills through a combination of:

Advanced Power Engineering MSc | The University of Edinburgh
This one-year programme is designed to equip graduates and professionals with a broad and robust training on modern power engineering technologies, with a strong focus on renewable energy conversion and smart grids.

Electrical Power Engineering MSc | The University of Edinburgh
Power Systems Engineers typically have a bachelor's degree in electrical engineering, but may also qualify for positions with a civil, industrial, mechanical, or construction management degree. Employers value practical experience, so graduates of cooperative engineering programs, in which students earn academic credit for structured work experience, are valuable.
