Water Supply Of Byzantine Constantinople

Aqueducts and the Water Supply System of Constantinople While Constantinople is famous for its strategic location, the triangular peninsula on which the city rested lacked sufficient fresh water sources. An extensive system of aqueducts was built in Late Antiquity to help supply water to the growing population of Constantinople.

Despite this, we are beginning to understand how one of the Roman world's most important cities provided its population with water. The remains of water infrastructure in Constantinople attest to a complex system of water-management and distribution, one that developed from the colony of Byzantium, through the growth and eventual decline of the new capital of the Roman empire, until conquest by the Ottomans.

The longest stretch ran from the vicinity of modern Vize to Constantinople: at over 250 km in length this is the longest single water supply line known from the ancient world. More than 30 stone water bridges and many kilometers of underground tunnels carried the water over mountain and plain to the heart of the city.

Water Supply of Constantinople

Byzantine Constantinople Water Supply. Throughout Byzantine history, transporting and storing water to provide for Constantinople's population was a major necessity. In fact, the filling of cisterns, maintenance of aqueducts, and repair of public baths in the empire was second in priority only to Constantinople's defense.
