(July 2019) (Learn how and when to remove this template message) Harley-Davidson engines are a line of engines

manufactured since 1903 in Milwaukee, Wisconsin by the Harley-Davidson company for use in its motorcycles.

### **Harley-Davidson engine timeline - Wikipedia**

Harley engines that were made before or in the 1960s have the model year of the engine as the first two numbers of the engine number, which acts as a VIN. Look for a four-digit production code in the last four digits of the VIN. For engines built between 1962 and 1969, there was a system put into the VIN to prevent tampering with or changing ...

Since 1929, Harley-Davidson engines have also been offered as smaller V-twin motors. Sometimes these smaller models are very difficult to distinguish from their larger brothers, but one rule has remained constant: Big Twins have always carried their final-drive chains (or belts) on the left side of the bike, while the smaller models have always had them on the right.
