The Guns of John Moses Browning

The Remarkable Story of the Inventor Whose Firearms Changed the World *Simon and*

Schuster

A “well-researched and very readable new biography” (The Wall Street Journal) of “the Thomas Edison of guns,” a visionary inventor who designed the modern handgun and whose awe-inspiring array of firearms helped ensure victory in numerous American wars and holds a crucial place in world history. Few people are aware that John Moses Browning—a tall, humble, cerebral man born in 1855 and raised as a Mormon in the American West—was the mind behind many of the world-changing firearms that dominated more than a century of conflict. He invented the design used in virtually all modern pistols, created the most popular hunting rifles and shotguns, and conceived the machine guns that proved decisive not just in World Wars I and II but nearly every major military action since. Yet few in America knew his name until he was into his sixties. Now, author Nathan Gorenstein brings firearms inventor John Moses Browning to vivid life in this riveting and revealing biography. Embodying the tradition of self-made, self-educated geniuses (like Lincoln and Edison), Browning was able to think in three dimensions (he never used blueprints) and his gifted mind produced everything from the famous Winchester “30-30” hunting rifle to the awesomely effective machine guns used by every American aircraft and infantry unit in World War II. The British credited Browning’s guns with helping to win the Battle of Britain. His inventions illustrate both the good and bad of weapons. Sweeping, lively, and brilliantly told, this fascinating book that “gun collectors and historians of armaments will cherish” (Kirkus Reviews) introduces a little-known legend whose impact on history ranks with that of the Wright Brothers, Thomas Edison, and Henry Ford.

The Writer's Guide to Weapons

A Practical Reference for Using Firearms and Knives in Fiction *Penguin*

When it comes to writing weapons, most authors shoot from the hip--and miss. The Writer's Guide to Weapons will help you hit your target every time. Firearms and knives have starring roles in a wide range of genres--crime, thriller, war, mystery, Western, and more. Unfortunately, many depictions of weapons in novels and film are pure fiction. Knowing the difference between a shotshell and a slug, a pistol and a revolver, or a switchblade and a butterfly knife is essential for imbuing your story with authenticity--and gaining popularity with discerning readers. Inside you'll find: • An in-depth look at the basics of firearms and knives: how they work, why they work, what they look like, and how to depict them accurately in your stories. • The biggest weapons myths in fiction, TV, and film. • A surefire guide for choosing the correct weapon for your characters, no matter their skill level, strength, or background. • A review of major gun and knife laws, weapons safety tips, and common police tactics. • "The Hit List," showcasing the most popular weapons for spies, detectives, gunslingers, gangsters, military characters, and more. • Examples highlighting inaccurate vs. accurate weapons depictions. • An insightful foreword by David Morrell, the award-winning creator of Rambo. Equal parts accessible, humorous, and practical, The Writer's Guide to Weapons is the one resource you need to incorporate firearms and knives into your fiction like a seasoned professional.

The Best Gun in the World

George Woodward Morse and the South Carolina State Military Works *Univ of South Carolina Press*

A thoroughly researched account of weapons innovation and industrialization in South Carolina during the Civil War and the man who made it happen. A year after seceding from the Union, South Carolina and the Confederate States government faced the daunting challenge of equipping soldiers with weapons, ammunition, and other military implements during the American Civil War. In The Best Gun in the World, Robert S. Seigler explains how South Carolina created its own armory and then enlisted the help of a weapons technology inventor to meet the demand. Seigler mined state and federal factory records, national and state archives, and US patents for detailed information on weapons production, the salaries and status of free and enslaved employees, and other financial records to reveal an interesting, distinctive story of technological innovation and industrialization in South Carolina. George Woodward Morse, originally from New Hampshire, was a machinist and firearms innovator, who settled in Louisiana in the 1840s. He invented a reliable breechloading

firearm in the mid-1850s to replace muzzleloaders that were ubiquitous throughout the world. Essential to the successful operation of any breechloader was its ammunition, and Morse perfected the first metallic, center-fire, pre-primed cartridge, his most notable contribution to the development of modern firearms. The US War Department tested Morse rifles and cartridges prior to the beginning of the Civil War and contracted with the inventor to produce the weapons at Harpers Ferry Armory. However, when the war began, Morse, a slave-holding plantation owner, determined that he could sell more of his guns in the South. The South Carolina State Military Works originally designed to cast cannon, produced Morse's carbine and modified muskets, brass cartridges, cartridge boxes, and other military accoutrements. The armory ultimately produced only about 1,350 Morse firearms. For the next twenty years, Morse sought to regain his legacy as the inventor of the center-fire brass cartridges that are today standard ammunition for military and sporting firearms. "Does justice to one of the greatest stories in American firearms history. If George Woodward Morse had not sided with the Confederacy, his name might be as famous today as Colt or Winchester." —Gordon L. Jones, Atlanta History Center "Excellent and well-researched." —Patrick McCawley, South Carolina Department of Archives and History "For connoisseurs and scholars of military history (especially Civil War), history of technology, or Southern/South Carolina history, this is a must-read and reference volume pertaining to a previously little-known aspect of the nineteenth century that had a far-reaching impact in the manner wars would be fought by soldiers decades later." —Barry L. Stiefel, College of Charleston

African Rifles and Cartridges

The Experiences and Opinions of a Professional Ivory Hunter

2014 Reprint of 1948 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. John Howard 'Pondoro' Taylor (1904 - 1969) was a big-game hunter of Irish descent. In Africa he experimented extensively using different types of rifles and calibers, which made him an expert in big game rifles. He is credited with developing the 'Taylor KO Factor' and wrote several now classic books. As a professional ivory hunter with some thirty years of continuous living in the African bush, John Taylor used and tested all the various calibers of British, American and German rifles, and with them killed many species of big game found on the continent of Africa. Taylor's discussion on the practical application of ballistics includes doubles, magazines, and single-shots; the practical value of steel-jacketed bullets versus those covered with cupronickel; the faults of copper-tubed bullets; the actual effects of softpoint bullets with varying degrees of lead exposure; the necessity of modern bullets that will really stand up to the requirements when fired into heavy animals; and many other valuable tips and explanations about cartridges and rifles. Remains a classic work.

Italian Small Arms of the First and Second World Wars *Schiffer Publishing*

This is the first comprehensive work, in either English or Italian, to address Italian small arms used during World War I and World War II. It describes each weapon and covers the developmental history and use of all Italian designed and produced pistols, rifles, submachine guns and machine guns used during both conflicts, as well as prototype weapons and foreign weapons used by the Italians. Other appendices cover bayonets, accoutrements, markings, ammunition, small arms manufacturing facilities, Italian small arms designers, production summaries, and collector's notes. It includes many previously unpublished photographs and background information on small arms producers, ammunition production facilities, and designers. In addition to the new material, it also corrects previously published errors about Italian weapons. AUTHOR: Ralph Riccio spent twenty years as a U.S. Army military intelligence officer. He has written numerous magazine articles, many in Italian, as well as having authored several books dealing with Italian and Irish military equipment and history. His native Italian fluency has enabled him to develop extensive contacts with Italian military history experts and to delve deeply into research on Italian weapons and history. This latest book on Italian military small arms is the culmination of years of research on the subject. ILLUSTRATIONS: 608 b/w and colour photographs

Spent Cartridges of Revolution

An Anthropological History of Namiquipa, Chihuahua *University of Chicago Press*

What happens to a revolutionary town after the revolution? This apparently simple question frames Spent Cartridges of Revolution, an anthropological history of Namiquipa, Chihuahua, Mexico.

Officially, the revolution of 1910-20 restored control over land and local politics to the peasantry. But Namiquipan peasants, who fought alongside Pancho Villa, have seen little progress and consider themselves mere "spent cartridges" of a struggle that benefited other classes. Daniel Nugent's approach combines an emphasis on peasants' own perceptions of Mexican society after the revolution with an analysis of the organization and formation of state power. He shows that popular discontent in Chihuahua is motivated not only by immediate economic crises but by two centuries of struggle between the people of Northern Mexico and the government.
