Pm Series Power Module Power

The PM Series Power Module is a uniquely adaptable communication equipment power source which functions as either power supply or battery charger for 12, 24 or 48 volt d.c. systems positive, negative or floating ground. Power Modules may be employed singly or in combination, enabling the installer to scale the system output from 560 to 6,000 watts

PM Series Power Module Power Supply/Battery Charger

The PM Series of proportional DC to DC high voltage power supply modules provides designers a miniature low cost PCB mount solution with a nominal performance isolated HV output. The PM Series operates from an input voltage of 5VDC to 12VDC with either positive or negative polarity to ground. By proportionally controlling the input voltage to the module over this input range an output range of 40% to 100% is generated.
