A Reinforcement Learning Model Of

Reinforcement learning is an area of machine learning concerned with how software agents ought to take actions in an environment in order to maximize the notion of cumulative reward. Reinforcement learning is one of three basic machine learning paradigms, alongside supervised learning and unsupervised learning. Reinforcement learning differs from supervised learning in not needing labelled input/output pairs be presented, and in not needing sub-optimal actions to be explicitly corrected. Instead

Reinforcement learning (RL) is an approach to machine learning that learns by doing. While other machine learning techniques learn by passively taking input data and finding patterns within it, RL uses training agents to actively make decisions and learn from their outcomes. Your training agents learn to play Pong in a simulated environment.

Reinforcement learning might sound exotic and advanced, but the underlying concept of this technique is quite simple. In fact, everyone knows about it since childhood! As a kid, you were always given a reward for excelling in sports or studies. Also, you were reprimanded or scolded for doing something mischievous like breaking a vase.

Reinforcement learning is modeled as a Markov Decision Process (MDP): An Environment E and agent states S . A set of actions A taken by the agent. $P(s, s') = P(s_{t+1} = s' | s_t = s, a_t = a)$ is the transition probability from one state s to s' . $R(s, s')$ - Immediate reward for any action.

Reinforcement Learning - an overview | ScienceDirect Topics

In reinforcement learning (RL), a model-free algorithm (as opposed to a model-based one) is an algorithm which does not use the transition probability distribution (and the reward function) associated with the Markov decision process (MDP), which, in RL, represents the problem to be solved. The transition probability distribution (or transition model) and the reward function are often collectively called the "model" of the environment (or MDP), hence the name "model-free".
