Heui Diesel Engine - bitofnews.com

A unit injector is a high pressure integrated direct fuel injection system for diesel engines, combining the injector nozzle and the injection pump in a single component. The plunger pump used is usually driven by a shared

camshaft. In a unit injector, the device is usually lubricated and cooled by the fuel itself. High pressure injection delivers power and fuel consumption benefits over earlier lower pressure fuel injection by injecting fuel as a larger number of smaller droplets, giving a much

Unit injector - Wikipedia

Inherent features of the HEUI fuel system include injection pressure control independent of engine load or speed, totally flexible injection timing, and full electronic control of injection parameters. The HEUI hydraulic actuating circuit is straightforward, using lubricating oil from the engine sump supplied by a high pressure pump.
