Answer : We just need to calculate the

quantile corresponding to a probability of 0.95, knowing that the brain volume follows a normal law $N(1100, 75^2)$.

`qnorm(0.95,mean=1100,sd=75,lower.tail = TRUE) ## 1223.364` So the 95th quantile for this distribution is approximately 1123.
