### **Fundamentals Of Economics Instructor S**

Economics is divided into two general categories: microeconomics and macroeconomics. One looks at the individual markets while the other looks at an entire economy. From there, we can narrow economics into a number of subfields of study. These include econometrics, economic development, agricultural economics, urban economics, and much more.

### **Economics for Beginners: Understanding the Basics**

The most basic principle of economics is the “law of supply and demand”, which is based on the concept of scarcity of goods. Since there are no “goods”, including the means to pay for those goods, that are unlimited in supply, human beings have to make choices between the options open to them. Even air and water, the basics of life, can be limited so that water in the desert and air on a mountain command a premium.
