Construction - Health and safety for the construction industry

Construction safety involves any safety procedure that is related to the construction industry or construction sites. Construction safety aims to ensure that a construction site or the industry as a whole is not the cause of immediate danger to the public around a construction site, or the workers at a construction site, as well as making sure that the finished product of construction meets required safety standards.

What is Construction Safety? - Definition from Safeopedia

The CHST is for the individual who works part-time or full-time in construction safety and health and who is typically responsible for entire construction projects or job sites. These safety and health practitioners have expertise in construction hazard identification, emergency preparedness, program implementation, communication and training.
