States Of Matter Notes Middle

- Matter is made up of particles too

small to be seen. • The three states of matter are solid, liquid, and gas. •

Solids, liquids and gases can be characterized by their properties (including volume, shape, and the movement and spacing of particles). •

Different densities of water, or solutions, will stratify to form layers.

States of Matter - NASA

Movement of particles. Very slow (vibrating) Moderate Very fast.

Examples Ice, salt, iron Water, oil, vinegar

Water vapor, helium, air. Changes in

States of Matter. Changing state = physical change. Ex: solid ice to liquid water.

States of Matter - Monadnock Regional High School

The States of Matter lesson begins with a states of matter characteristic card sort. Each card displays a word or phrase related to a solid, liquid, and gas. Students discuss with their groups and arrange them on a sorting mat. The lesson continues with a visual card sort (images of solids, liquids, and gases).

States of Matter for Middle School - PhET Contribution

I think we're all reasonably familiar with the three states of matter in our everyday world. At very high temperatures you get a fourth. But the three ones that we normally deal with are, things could be a solid, a liquid, or it could be a gas. And we have this general notion, and I think water is the example that always comes to at least my mind.
