Data from healthy children are needed to evaluate bone mineralisation during childhood. Whole body bone mineral content (BMC) and bone area were examined by dual energy x ray absorptiometry (Hologic 1000/W) in healthy girls (n=201) and boys (n=142) aged 5-19 years. Centile curves for bone area for age, BMC for age, bone area for height, and BMC for bone area were constructed using the LMS ...

Whole body bone mineral content in healthy children and ...

A bone is a rigid organ that constitutes part of the vertebrate skeleton in animals. Bones protect the various organs of the body, produce red and white blood cells, store minerals, provide structure and support for the body, and enable mobility. Bones come in a variety of shapes and sizes and have a complex internal and external structure.

Bone - Wikipedia

Signs include lameness, bone swelling, and fractures of the bone that are not caused by injury. X-rays of the affected limb can help confirm the diagnosis. Chest x-rays should be performed to look for any tumors that may be spreading to or from the bones. A bone biopsy is required to confirm the diagnosis.
