Pathways to Personal Freedom Using the Silva Method
Balboa Press

Pathways to Personal Freedom using the Silva Method is a compilation of fifty ideas to help uncover the ways of inner bliss that lay dormant within each of us. Happiness and Personal Freedom are concepts that most of us have taken for granted. Society teaches us to please others; look for approval and acceptance from others; check in with those who "know better" than we do; allow our negative thoughts to overtake our actions, our way of life and even health. Each Pathway starts with a quote to encourage thinking and inspiration to bring about a spark of insight that is already known but may have been forgotten along the way. What follows are suggestions and examples from the authors' lives and experiences as to how to achieve bliss and inner harmony. Each will end with an affirmation to be recited in the present time to instill the ideas as if they are already in place and to help enhance this new way of thinking. Some of these ideas may be new and even foreign—but they have stood the test of time and used by many throughout the world. Jose Silva, Sr. was a pioneer in the study and application of mind control. His youngest daughter, Diana Silva-Mendez and coauthor, Robert Deutchman have put together this labor of love for the benefit of Silva Method enthusiasts, trainers, Silva graduates, and to all who seek to tap into their inner wisdom.

I Am Getting Better and Better *Createspace Independent Publishing Platform*

Auto-suggestion is disconcerting in its simplicity. To the uninitiated, auto-suggestion or self-mastery is likely to appear disconcerting in its simplicity. But does not every discovery, every invention, seem simple and ordinary once it has become vulgarized and the details or mechanism of it known to the man in the street? Think of all the forces of the Universe ready to serve us. Yet centuries elapsed before man penetrated their secret and discovered the means of utilizing them. It is the same in the domain of thought and mind: we have at our service forces of transcendent value of which we are either completely ignorant or else only vaguely conscious. Power of auto-suggestion known in the Middle Ages. The power of thought, of idea, is incommensurable, is immeasurable. The world is dominated by thought. The human being individually is also entirely governed by his own thoughts, good or bad. The powerful action of the mind over the body, which explains the effects of suggestion, was well known to the great thinkers of the Middle Ages, whose vigorous intelligence embraced the sum of human knowledge. Every idea conceived by the mind, says Saint Thomas, is an order which the organism obeys. It can also, he adds, engender a disease or cure it. The efficaciousness of auto-suggestion could not be more plainly stated. Pythagoras and Aristotle taught auto-suggestion. We know, indeed, that the whole human organism is governed by the nervous system, the centre of which is the brain-the seat of thought. In other words, the brain, or mind, controls every cell, every organ, and every function of the body. That being so, is it not clear that by means of thought we are the absolute masters of our physical organism and that, as the Ancients showed centuries ago, thought-or suggestion-can and does produce disease or cure it? Pythagoras taught the principles of auto-suggestion to his disciples. He wrote: "God the Father, deliver them from their sufferings, and show them what supernatural power is at their call." Even more definite is the doctrine of Aristotle, which taught that "a vivid imagination compels the body to obey it, for it is a natural principle of movement. Imagination, indeed, governs all the forces of sensibility, while the latter, in its turn, controls the beating of the heart, and through it sets in motion all vital functions; thus the entire organism may be rapidly modified. Nevertheless, however vivid the imagination, it cannot change the form of a hand or foot or other member." I have particular satisfaction in recalling this element of Aristotle's teaching, because it contains two of the

most important, nay, essential principles of my own method of auto-suggestion: 1. The dominating role of the imagination. 2. The results to be expected from the practice of auto-suggestion must necessarily be limited to those coming within the bounds of physical possibility. Unfortunately, all these great truths, handed down from antiquity, have been transmitted in the cloudy garb of abstract notions, or shrouded in the mystery of esoteric secrecy, and thus have appeared inaccessible to the ordinary mortal. If I have had the privilege of discerning the hidden meaning of the old philosophers, or extracting the essence of a vital principle, and of formulating it in a manner extremely simple and comprehensible to modern humanity, I have also had the joy of seeing it practiced with success by thousands of sufferers for more than a score of years. I hope to show, moreover, that the domain of application of auto-suggestion is practically unlimited. Not only are we able to control and modify our physical functions, but we can develop in any desired direction our moral and mental faculties merely by the proper exercise of suggestion: in the field of education there is vast scope for suggestion. Nothing is impossible to us, except, of course, that which is contrary to the laws of Nature and the Universe."

The Code of the Extraordinary Mind *Rodale*

What if everything we think we know about how the world works--our ideas of love, education, spirituality, work, happiness, and love--are based on Brules (bullsh*t rules) that get passed from generation to generation and are long past their expiration date? This book teaches you to think like some of the greatest non-conformist minds of our era, to question, challenge, hack, and create new rules for YOUR life so you can define success on your own terms. The Code of the Extraordinary Mind is a blueprint of laws to break us free from the shackles of an ordinary life. It makes a case that everything we know about the world is shaped by conditioning and habit. And thus, most people live their lives based on limiting rules and outdated beliefs about pretty much everything--love, work, money, parenting, sex, health, and more--which they inherit and pass on from generation to generation. But what if you could remove these outdated ideas and start anew? What would your life look like if you could forget the rules of the past, and redefine what happiness, purpose, and success mean for you? Not Just a Book, but a Movement Blending computational thinking, integral theory, modern spirituality, evolutionary biology, and humor, personal growth entrepreneur Vishen Lakhiani provides a revolutionary 10-point framework for understanding and enhancing the human self. You will learn about bending reality. You will learn how to apply unique models like consciousness engineering to help you learn and grow at speeds like never before. You will learn to make a dent in the universe and discover your quest. This framework is based on Lakhiani's personal experiences, the 5 million people he's reached through Mindvalley, and 200 hours of interviews and questions posed to incredible minds, including Elon Musk, Richard Branson, Peter Diamandis, Ken Wilber, Dean Kamen, Arianna Huffington, Michael Beckwith, and other legendary leaders. In a unique fusion of cutting-edge ideas, personal stories, irreverence, and a brilliant teaching style, Lakhiani reveals the 10 powerful laws that form a step-by-step process that you can apply to life to

Subjective Communication *CreateSpace*

What is Subjective Communication? Subjective Communication is a natural ability that all of the highly successful people on our planet have in common. Subjective Communication is the ability that permits people to know more than their physical senses alone can tell them. Subjective Communication is the one "secret of success" that people have sought to reveal for thousands of years, yet remained hidden because those who had it did not realize that the way they functioned was different from the way the vast majority of people function, and those who didn't have it considered it so unlikely that they doubted its existence. For the fortunate few who, through natural means, developed the ability to use subjective communications to know more than the majority of people, life has been a fabulous success. These people - about ten percent of the population - are the ones we consider "lucky." Though they do no more work than other people, they prosper. Though they are no more persistent than millions of others, they succeed while others fail. Though they are no more intelligent than the masses, we call them geniuses. You can develop this ability. All humans are born with the potential to communicate in more ways than through the physical senses. It is your mind, and your phenomenal imagination, that makes you human. In this book, you will learn why imagination is not only used for make believe, but is also used as a communications tool. You will learn exactly what human intelligence is, and what mind is, and how these function in another - invisible-to-the-human-eyes - dimension where we exchange vital information that helps improve our relationships, our decision making ability, and our chances for success and happiness in this life. You will have a rare opportunity to look inside the mind of a genius, a natural psychic who has been using this ability for more than sixty years, as this genius is interviewed by a veteran newspaper reporter turned researcher. This insight and understanding will help you develop your own abilities. Never before has there been a book like this one, that strips the mystery away and explains in simple language exactly what this thing called ESP really is and how you can learn to use it like the most successful people in our world do. It is your heritage as a human being. Use it.

Truly Frank *Penguin UK*

Passionate, gossipy, opinionated and seriously entertaining, Truly Frank is an instant classic of journalistic memoir. Journalist Frank

McDonald is best known as, in the words of Bob Geldof, 'a permanent thorn in the fat arse of municipal pretension'. The scourge of negligent planners, unscrupulous property developers and cynical politicians, and champion of environmental protection and sustainable development, McDonald's work in the Irish Times has been key to grasping how Ireland actually works. McDonald's sense of mission grew out of an endlessly enquiring mind. After a happy 1950s childhood in a conventional Catholic home he ventured forth - into Dublin's hidden gay scene, into student politics at UCD, into the worlds of journalism, architecture and Ireland's beau monde, into a life of travel - always in a spirit of openness and unmitigated curiosity. The rewards in friendship, knowledge and understanding have been immeasurable. Now, in Truly Frank, McDonald tells the stories behind his public and private lives - his long and fruitful career, his activism and legendary battles, his deep ties to family and friends, his four-decade partnership with his spouse Eamon Slater. 'Although, as a journalist, I have never shied away from revealing what I believe to be true, revisiting my life and times has been as challenging as it has been therapeutic and even enjoyable ...'
