A sequential manual transmission (like the kind of gearbox used on a fully-manual motorcycle) is a

type of multi-speed non-synchronous manual transmission, which only allows the driver to select either the next gear (e.g., shifting from second gear to first gear) or the previous gear (e.g. shifting from second gear to third gear), in succession. This restriction avoids accidentally selecting the wrong gear, however, it also prevents the driver from deliberately "skipping" gears.
