The document camera is a tremendous instructional tool that you probably use daily. There are more options than just displaying a document/thinking in real time. Your document camera has the capability to take digital stills (pictures) or shoot videos for future use or as an archive of your thinking/student learning. Being able to record your lessons as an archive is invaluable, as well as, setting up lessons for when you are unable to be in your classroom.

Typically, the document camera is hooked up to the computer projector and the computer is hooked up to the document camera. The signal from the computer passes through the document camera, and the teacher (or student) switches back and forth between the two devices by pressing a button on the document camera. However, it is possible for many of these document cameras to connect them to the computer and have the image from the camera appear as a window on the computer.

How can I hook up my document camera so I can view the ...
