Physics in Nuclear Medicine - 4th Edition

Nuclear medicine is a medical specialty involving the application of radioactive substances in the diagnosis and

treatment of disease. Nuclear medicine imaging, in a sense, is "radiology done inside out" or "endoradiology" because it records radiation emitting from within the body rather than radiation that is generated by external sources like X-rays. In addition, nuclear medicine scans differ from radiology, as the emphasis is not on imaging anatomy, but on the function. For such reason, it is
