Governing Global Production:

Resource Networks in the Asia ...

Since its initial inception almost two

decades ago, global production network (GPN) research has developed into a vibrant, capacious and heterogeneous research field. 1 Although primarily anchored in economic geography, it is part of a wider inter-disciplinary research community that also encompasses the cognate global commodity chain (GCC) and global value chain (GVC) approaches. 2 In recent times, that broad field has in turn started to interface more productively with work in ...

PRODUCTION ...

In (environmental) economic geography, the concept of global production networks has proved helpful for the discussion of problems connected with resources. An adaptation of this concept is...

(PDF) Sustainable resource governance in global production ...

Despite the transnationality of global production networks, the emergence of these historically novel industrial systems does not imply a definite shift in the locus of economic governance from states to firms. As the experience of the Asia-Pacific resource networks attests, global production networks are to a large degree privately governed, and are organised through the sets of inter-firm

relationships that regulate and manage the functional integration between firms.

Governing Global Production | SpringerLink

Sustainable resource governance in global production networks – challenges for human geography. Transnational debates, for instance on the finiteness of fossil resources and their harmful effects on the climate, are often regarded as interdisciplinary challenges in the social and natural sciences. By contrast, in the past two decades, notably in the 2000s, geography appears to have been forgetful of resources.

Sustainable resource governance in global production ...

Global Production Networks. A global

production network is one whose interconnected nodes and links extend spatially across national boundaries and, in so doing, integrates parts of disparate national and subnational territories". GPN frameworks combines the insights from the global value chain analysis, actor-network theory and literature on Varieties of Capitalism. GPN provides a relational framework that aims to encompass all the relevant actors in the production systems.

Governing global production: resource networks in the Asia ...

Introduction. In this paper, we mobilise a global production networks (GPN) perspective to explore the trans-border investments of Taiwan's leading personal computer (PC) firms in mainland China. The GPN perspective (see, e.g., Coe et al. 2004; Coe, Dicken, and Hess 2008; Dicken et al. 2001; Henderson et al. 2002) is an approach being developed within economic geography that seeks to build on the considerable insights provided by the cognate global commodity chain (GCC) and global value ...

The Governance of Global Production Networks and Regional ...

Global production networks (GPNs) refer to activities and organizational structures that transform labor, nature, and capital across disparate geographies into commodities and services. The framework is often used to understand economic development and the socio-ecological transformation of natural resources.
