CBD Processing from Hemp. Processing hemp to produce CBD for medical use is a multi-stage process that should be performed under food safety or pharmaceutical quality standards such as GMP (Good Manufacturing Practice). Manufacturing medical CBD products such as hemp oil, CBD distillate and CBD isolate as well as finished product manufacture require a consistent source of high CBD hemp flower or hemp biomass.

CBD Processing from Hemp - Rhizo Sciences Hemp CBD Oil

The creation of THC from CBD needs very little workup. The process itself only requires a strong acid and heat to start, catalyse, and maintain the reaction. An untrained, interested novice with a simple set of instructions could very easily create delta-9-THC from CBD in a home lab environment.

Converting CBD to THC: It’s Easy, Potentially Harmful ...

Cannabis/THC extraction is primarily a hydrocarbon-based process that uses a closed-loop system and residual solvent removal, such as vacuum drying ovens. As with hemp/CBD extraction, processing cannabis requires distillation equipment, as well as post-processing equipment like glassware, a jacketed reactor, or a “diamond mine,” which again depends on the desired finished products.
