To learn more about what makes up force, review the corresponding lesson on Force in Physics. This lesson covers the following objectives: Define force in terms of interaction, push/pull and direction

Quiz & Worksheet - Force in Physics | Study.com

In previous labs you have examined the one-dimensional motions of an object caused by a single force applied to the object. You have seen that when friction is so small that it can be ignored, a single constant applied force will cause an object to have a constant acceleration. (The object will speed up at a steady rate.)
