It i. It seems sacrilegious to say this, but Kazantzakis' modern sequel to The Odyssey is superior to Homer's in every way, at least from the perspective of the modern mind. This is one of the greatest accomplishments of world literature, and it is a tragedy that it is not better known; most people have heard of Kazantzakis' Zorba The Greek but few people are familiar with this, his masterpiece.

The Odyssey : A Modern Sequel This book is incredibly well done. Kazantzakis' use of metaphor is the best that I have ever seen. If I may say so without risk, I honestly believe that this is actually much better than the original one by Homer. And to top it off it is also quite humorous! 6 people found this helpful.
