The final chapter of *Programmed Visions*, "Always Already There, or Software as Memory," functions persuasively as a refining gesture, elaborating on a trope running throughout the book, namely that memory is not the same as storage. This distinction is important to Chun because "memory is not a static but

rather an active process.

These programmed visions have also made computers, based on metaphor, metaphors for metaphor itself, for a general logic of substitutability. Chun argues that the clarity offered by software as metaphor should make us pause, because software also engenders a profound sense of ignorance: who knows what lurks behind our smiling interfaces, behind the objects we click and manipulate?
