Dimensioning of crane foundations on soft soil is usually performed with analytical equations. According to IEG, the recommended method for calculating vertical bearing capacity is the general

bearing capacity equation (IEG, 2010).

Crane foundations on soft soil

A construction tower crane is a common piece of lifting equipment found on construction sites. It is called a tower crane because of the large tower like structure the crane pivots around. The tower mast supports the jib and counter jib which in turns supports the cabling, trolley and hook which does the lifting.

A Guide To Tower Cranes And Their Use on Construction Sites
