Electronic Governor For Diesel Engine

Diesel Engine Generator Governors. Diesel engine generator governors are sometimes referred to as the speed controller for the diesel engine. The diesel engine must maintain a pre-determined speed to maintain generator output specifications. If the engine speed is not correct the generator will not maintain the required output specifications.

Diesel Engine Generator Governors

Electronic governors deliver fast, no-droop response to load changes and isochronous speed control for gensets. They are up to 200 times faster than mechanical governors. This means that there is no droop on gen-sets, so power stays constant under variable loads on pumps and other engine applications.

Electronic Governors - Electronic Governing System - GAC ...

The mechanical fly-weight governors of inline and distributor diesel fuel injection pumps used to control fuel delivery in diesel engines under a variety of engine loads and conditions could no longer deal with the ever-increasing demands for efficiency, emission control, power and fuel consumption. These demands are now primarily fulfilled by the Electronic Control, the system which provides greater ability for precise measuring, data processing, operating environment flexibility and ...

(PDF) Design of an Electronic Governor for a Diesel ...

The electronic governor converts the change of diesel engine speed into the change of electric quantity, and controls the actuator after sampling and amplifying. This governor can adjust the fuel supply before the speed of diesel engine changes obviously, and obtain high adjusting precision, and realize parallel operation without difference.

Introduction of Governor in Diesel Generator

The Electronic Governor regulates the engine speed by sensing the engine's RPM with the magnetic pick-up at the flywheel. The governor's controller continuously monitors the engines speed and if there is any discrepancy, the controller signals the actuator and the actuator adjusts the engine to the desired speed electronically.

ELECTRONIC GOVERNORS - MARINE DIESEL BASICS

Governor of engine is a piece of instrument and an integral part of engine working system. Well the main function of a Governor is to control the speed or RPM of the engine in a control manner. What happens is that when load on engines changes, engine tends to accelerate or decelerate.
