The most reliable of the transmissions Mini manufactured is the 6 speed manual variation. MINI Cooper Timing Chain Noise. The timing chain rattle (as discussed in an earlier blog post) is a common problem. The noise is usually

heard at idle on a cold start and it is often referred to as “the death rattle”. This can be a major/costly repair and it is recommended not to ignore this noise if you hear it. This problem is usually caused by low oil, or the oil not being changed frequently enough.

...

A big issue that has become apparent in first generation Mini Cooper cars equipped with CVT automatic transmissions is complete transmission failure. This problem is actually the result of the manufacturer stating the transmission does not require routine transmission fluid services, but in reality they do. Most mechanics agree that

transmission serviced should be completed every 30K to 40K miles.
