Spacecraft Attitude Determination And Control

Spacecraft attitude determination and control is an important part for a spacecraft to achieve its designed mission. As for today, many spacecrafts have been successfully launched, and most of them have performed well as they were designed. Many research papers have been published to address the attitude determination and control design problems.

ATTITUDE DETERMINATION: Real-Time or Post-Facto knowledge, within a given tolerance, of the spacecraft attitude ATTITUDE CONTROL: Maintenance of a desired, specified attitude within a given tolerance ATTITUDE ERROR: "Low Frequency" spacecraft misalignment; usually the intended topic of attitude control

Attitude Determination and Control (ADCS)

Attitude Determination and Control • Provides rate stabilization and pointing for payload, power, communication, and thermal subsystems during normal and safing operations • Provides rate and attitude control for transfer orbit, and station keeping maneuvers • Provides spacecraft attitude knowledge to support mission objectives

AA236: Overview of Spacecraft Attitude Determination and ...

Spacecraft Attitude Determination and Control (Astrophysics and Space Science Library) J.R. Wertz. This classic book is the first comprehensive presentation of data, theory, and practice in attitude analysis. It was written by 33 senior technical staff members in the Spacecraft Attitude Department of the Computer Sciences Corporation and incorporates their experience in supporting more than 30 space missions.

Spacecraft Attitude Determination and Control ...

The Attitude Determination and Control System (ADCS) is a crucial subsystem of a spacecraft. It provides pointing accuracy and stability of the payloads and antennas as critical parts of the S/C operation and the mission success.

Attitude Determination and Control System (ADCS)

Attitude control is the process of orienting the spacecraft in a specified predetermination direction. It consists of two areas - attitude stabilization which is the process of maintaining an existing orientation, and attitude maneuver control which is the process of controlling the reorientation of the spacecraft from one attitude to another.

Introduction to the spacecraft attitude concept ...

Attitude Determination and Control Systems In the year 1900, Galveston, Texas, was a bustling community of approximately 40,000 people. The former capital of the Republic of Texas remained a trade center for the state and was one of the largest cotton ports in the United States.

NASA Technical Reports Server (NTRS)

For example 1. In LEO, the attitude will affect the atmospheric drag which will affect the orbit 2. The orbit determines the spacecraft position which determines both the atmospheric density and the magnetic field strength, which will, in turn, affect

the attitude But this dynamic coupling is often ignored, and the time history of the spacecraft position is assumed to be known and to be an input for ADCS This coupling can even be used on purpose: (Limited) orbit control using differential drag.

AERO0025 Satellite Engineering - S3L

Attitude control is the process of controlling the orientation of an aerospace vehicle with respect to an inertial frame of reference or another entity such as the celestial sphere, certain fields, and nearby objects, etc. Controlling vehicle attitude requires sensors to measure vehicle orientation, actuators to apply the torques needed to orient the vehicle to a desired attitude, and algorithms to command the actuators based on sensor measurements of the current attitude and specification of a
