Concrete Pumping Guide Cement Aggregates

A good pump mix concrete, your ready mixed concrete supplier will advise. 2. The minimum cement content for a pump mix is 270kg per cubic metre this can increase dependant on the distance that the concrete is required to be pumped; this must be specified when ordering and pricing the concrete, as these figures will exceed the normal cement content of some mixes and will

affect the price.

Concrete Pumping Guide - Radbournes

He notes that water content is often higher in lightweight concrete than in standard-weight concrete and that sufficient aggregate moisture is critical in successfully pumping lightweight concrete. The critical factor is to make sure the lightweight aggregate is saturated surface-dry as it goes in so that it will not absorb water from the mix, especially under the pressure of pumping.

Making Concrete Pumpable| Concrete Construction Magazine

Concrete pumps and concrete placing booms make a significant contribution to

the efficient delivery of the construction process. The development of concrete pumps has allowed concrete to be pumped under pressure through pipelines across great distances and in significant volumes.

Safe Use of Concrete Pumps - Concrete Pumping - Nationwide

This gives a stronger and denser concrete. Rounded aggregates give a more workable mix. Angular aggregates make concrete harder to place, work and compact, but can make concrete stronger. STORAGE Aggregates should be stored where they will stay clean, separated from other materials and dry. If the aggregates are very wet use less water in the mix.

community. CCAA is acknowledged nationally and internationally as Australia's foremost cement and concrete information body – taking a leading role in education

CCAA Guide to Concrete Flatwork Finishes

In a good concrete, all concrete aggregates are evenly coated with sand and cement paste and forms a homogeneous mass. During handling, transporting and placing, due to jerks and vibrations the paste of cement and sands gets separated from coarse aggregate. If concrete segregates during transit it should be remixed properly before depositing.

Segregation of Concrete - Causes

and Prevention

Grading limits and maximum aggregate size are specified because these properties affect the amount of aggregate used as well as cement and water requirements, workability, pumpability, and durability of concrete. In general, if the water-cement ratio is chosen correctly, a wide range in grading can be used without a major effect on strength. When gap-graded aggregate are specified, certain particle sizes of aggregate are omitted from the size continuum. Gap-graded aggregate are used to ...
