Arctic Environment Variability in the Context of Global ...

The Response to Arctic Climate Variability. With the emergence of a coherent picture of Arctic climate change over the last several centuries comes the realization that interannual to century-scale Arctic climate variability is the norm. This variability has affected many aspects of the Arctic environment.

Arctic Environmental Change of the Last Four Centuries ...

The climate of the Arctic is characterized by long, cold winters and short, cool summers. There is a large amount of variability in climate across the Arctic, but all regions experience extremes of solar radiation in both summer and winter. Some parts of the Arctic are covered by ice (sea ice, glacial ice, or snow) year-round, and nearly all parts of the Arctic experience long periods with some form of ice on the surface.

Arctic Environment Variability in the Context of Global ...

This study uses seven models following a common experimental protocol to investigate the atmospheric circulation changes forced by Arctic sea ice variability. The protocol allows the Arctic sea ice-driven variability (SIDV) to be singled out. In boreal winter, the Arctic SIDV is ~0.18 hPa² and accounts for only ~1.5% of the total variance for sea level pressure, while it is

~0.35 K 2 and accounts for ~21% for surface air temperature. The results also suggest that using insufficient ...
