You can download the LED flasher source code at the bottom of this page. Open up the source code in MPLAB IDE - remember, if you chose to open the asm file in the browser and then copy and paste into MPLAB, then you must first save it as a .asm file! but if you chose to right click the above link, save the file and then open it MPLAB, then it will come up just fine.

Both the C code and the assembly code can access variables independently. As a practical matter it is advisable to let the C code manage the variables and pass parameters to the assembly code either by value or by reference. The Chapters 5 Register usage and 6 Parameter passing describes how the registers sets are used by the C compiler and
