The Surprising Truth About Moving Others Penguin

Look out for Daniel Pink’s new book, When: The Scientific Secrets of Perfect Timing #1 New York Times Business Bestseller #1 Wall Street Journal Business Bestseller #1 Washington Post bestseller From the bestselling author of Drive and A Whole New Mind, and teacher of the popular MasterClass on Sales and Persuasion, comes a surprising--and surprisingly useful--new book that explores the power of selling in our lives. According to the U.S. Bureau of Labor Statistics, one in nine Americans works in sales. Every day more than fifteen million people earn their keep by persuading someone else to make a purchase. But dig deeper and a startling truth emerges: Yes, one in nine Americans works in sales. But so do the other eight. Whether we’re employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others. Like it or not, we’re all in sales now. To Sell Is Human offers a fresh look at the art and science of selling. As he did in Drive and A Whole New Mind, Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others (it's no longer "Always Be Closing"), explains why extraverts don't make the best salespeople, and shows how giving people an "off-ramp" for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book--one that will change how you see the world and transform what you do at work, at school, and at home.

Then he provides a set of tools, tips, and exercises for succeeding on each new terrain: six new ways to pitch your idea, three ways to understand another's perspective, five frames that can make your message clearer, and much more.

Drive

The Surprising Truth About What Motivates Us Penguin

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose-and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

The Power of Regret

Everybody has regrets, Daniel H. Pink explains in The Power of Regret. They’re a universal and healthy part of being human. And understanding how regret works can help us make smarter decisions, perform better at work and school, and bring greater meaning to our lives. Drawing on research in social psychology, neuroscience, and biology, Pink debunks the myth of the “no regrets” philosophy of life. And using the largest sampling of American attitudes about regret ever conducted as well as his own World Regret Survey—which has collected regrets from more than 15,000 people in 105 countries—he lays out the four core regrets that each of us has. These deep regrets offer compelling insights into how we live and how we can find a better path forward. As he did in his bestsellers Drive, When, and A Whole New Mind, Pink lays out a dynamic new way of thinking about regret and frames his ideas in ways that are clear, accessible, and pragmatic. When: The Scientific Secrets of Perfect Timing Penguin

The instant New York Times Bestseller #1 Wall Street Journal Business Bestseller Instant Washington Post Bestseller "Brims with a surprising amount of insight and practical advice." --The Wall Street Journal Daniel H. Pink, the #1 bestselling author of Drive and To Sell Is Human, unlocks the scientific secrets to good timing to help you flourish at work, at school, and at home. Everyone knows that timing is everything. But we don't know much about timing itself. Our lives are a never-ending stream of "when" decisions: when to start a business, schedule a class, get serious about a person. Yet we make those decisions based on intuition and guesswork. Timing, it's often assumed, is an art. In When: The Scientific Secrets of Perfect Timing, Pink shows that timing is really a science. Drawing on a rich trove of research from psychology, biology, and economics, Pink reveals how best to live, work, and succeed. How can we use the hidden patterns of the day to build the ideal schedule? Why do certain breaks dramatically improve student test scores? How can we turn a stumbling beginning into a fresh start? Why should we avoid going to the hospital in the afternoon? Why is singing in time with other people as good for you as exercise? And what is the ideal time to quit a job, switch careers, or get married? In When, Pink distills cutting-edge research and data on timing and synthesizes them into a fascinating, readable narrative packed with irresistible stories and practical takeaways that give readers compelling insights into how we can live richer, more engaged lives.

You Have More Influence Than You Think: How We Underestimate Our Power of Persuasion, and Why It Matters *W. W. Norton & Company*

An original investigation of our hidden power to persuade, and how to wield it wisely. If you’ve ever felt ineffective, invisible, or inarticulate, chances are you weren’t actually any of those things. Those feelings may instead have been the result of a lack of awareness we all seem to have for how our words, actions, and even our mere presence affect other people. In You Have More Influence Than You Think social psychologist Vanessa Bohns draws from her original research to illustrate why we fail to recognize the influence we have, and how that lack of awareness can lead us to miss opportunities or accidentally misuse our power. Weaving together compelling stories with cutting edge science, Bohns answers the questions we all want to know (but may be afraid to ask): How much did she take to heart what I said earlier? Do they know they can push back on my suggestions? Did he notice whether I was there today? Will they agree to help me if I ask? Whether attending a meeting, sharing a post online, or mustering the nerve to ask for a favor, we often assume our actions, input, and requests will be overlooked or rejected. Bohns and her work demonstrate that people see us, listen to us, and agree to do things for us much more than we realize—for better, and worse. You Have More Influence Than You Think offers science-based strategies for observing the effect we have on others, reconsidering our fear of rejection, and even, sometimes, pulling back to use our influence less. It is a call to stop searching for ways to gain influence you don’t have and to start recognizing the influence you don’t realize you already have.

Everybody Matters

The Extraordinary Power of Caring for Your People Like Family *Penguin*

“Bob Chapman, CEO of the \$1.7 billion manufacturing company Barry-Wehmiller, is on a mission to change the way businesses treat their employees.” – Inc. Magazine Starting in 1997, Bob Chapman and Barry-Wehmiller have pioneered a dramatically different approach to leadership that creates off-the-charts morale, loyalty, creativity, and business performance. The company utterly rejects the idea that employees are simply functions, to be moved around, "managed" with carrots and sticks, or discarded at will. Instead, Barry-Wehmiller manifests the reality that every single person matters, just like in a family. That’s not a cliché on a mission statement; it’s the bedrock of the company’s success. During tough times a family pulls together, makes sacrifices together, and endures short-term pain together. If a parent loses his or her job, a family doesn’t lay off one of the kids. That’s the approach Barry-Wehmiller took when the Great Recession caused revenue to plunge for more than a year. Instead of mass layoffs, they found creative and caring ways to cut costs, such as asking team members to take a month of unpaid leave. As a result, Barry-Wehmiller emerged from the downturn with higher employee morale than ever before. It’s natural to be skeptical when you first hear about this approach. Every time Barry-Wehmiller acquires a company that relied on traditional management practices, the new team members are skeptical too. But they soon learn what it’s like to work at an exceptional workplace where the goal is for everyone to feel trusted and cared for—and where it’s expected that they will justify that trust by caring for each other and putting the common good first. Chapman and coauthor Raj Sisodia show how any organization can reject the traumatic consequences of rolling layoffs, dehumanizing rules, and hypercompetitive cultures. Once you stop treating people like functions or costs, disengaged workers begin to share their gifts and talents toward a shared future. Uninspired workers stop feeling that their jobs have no meaning. Frustrated workers stop taking their bad days out on their spouses and kids. And everyone stops counting the minutes until it’s time to go home. This book chronicles Chapman’s journey to find his true calling, going behind the scenes as his team tackles real-world challenges with caring, empathy, and inspiration. It also provides clear steps to transform your own workplace, whether you lead two people or two hundred thousand. While the Barry-Wehmiller way isn’t easy, it is simple. As the authors put it: "Everyone wants to do better. Trust them. Leaders are everywhere. Find them. People achieve good things, big and small, every day. Celebrate them. Some people wish things were different. Listen to them. Everybody matters. Show them."

Pivot, Disrupt, Transform

How Leaders Beat the Odds and Survive *Diversion Books*

When the status quo no longer works, the contrarian perspective reigns! In this innovative business how-to, leadership expert Marcia Daszko draws on her expertise to guide leaders at any level through a three-step process to radically improve their businesses: first, recognize and stop outmoded ways of thinking that fail to move the business forward (like focusing on the bottom line, conducting performance appraisals, and searching for best practices); second, start taking steps to introduce new, innovative ways of thinking and contrarian practices (such as developing leaders with the capacity to effect change, creating an interconnected team, and seeking knowledge through questions); and finally, transform your company into a more resilient, adaptive, and united organization. Recent studies have reported that 90% of start-ups will fail. In Silicon Valley alone, this means that more than 5,400 of the current 6,000 startups will flounder and disappear. But risky and cash-strapped start-ups are not the only corporate fatalities: More than 60% of the original Fortune 500 corporations no longer exist. Given these statistics, how can organizational leaders and their employees beat the odds and survive? The only solution is to question the usual business practices, re-think how to lead and inspire, challenge the accepted beliefs, and toss out the failures to accelerate business growth and profitability. Using Marcia's three-part stop, start, transform method, readers will learn to pursue significant untapped opportunities, achieve their organization's competitive edge, and pivot, disrupt, and adapt to unexpected levels of success.

Sell the Way You Buy

A Modern Approach To Sales That Actually Works (Even On You!) *Page Two*

While a Vice President at Salesforce, David Priemer had an epiphany during one of the company's high-pressure selling periods: the very sales tactics they were using were not working on him. Yes, the numbers still showed results, but through brute force rather than elegance and efficiency. Priemer also discovered that his sales colleagues were spending far more time on leads that did not convert to sales than on those that did. His company--and his entire profession--was acting with more than enough gusto, but without enough awareness and empathy. They were not selling the way they buy. Sell the Way You Buy is about much more than putting yourself in the customer's shoes. Customers don't always know what they want or need, or they may be seeking a solution for something that isn't their core problem. They suffer from status quo bias, from recency bias, from confirmation bias. And meanwhile, the state of overwhelming choice has most products and solution providers adrift in the "Sea of Sameness." In today's world, almost everyone is in sales, but as Priemer realized, we don't teach it. Sell the Way You Buy will show you how to ask questions, how to listen, how to tell a compelling brand story, and how to talk to customers (how to talk to people). Priemer reveals scientifically supported methods to understand the customer, identify their needs, and move them toward the right solution--all the while teaching you to avoid all the reasons why the average person doesn't like salespeople. In short, to sell the way you buy.

The global workforce today is so fried that it belongs in the food court of a county fair. We’re relentlessly behind the curve, dousing fires everywhere, and our 3 a.m. insomnia provides the only unscheduled thinking time of the day. What we need reinserted in our lives is the missing element of white space—short periods of open, unscheduled time that, when recaptured, change the very nature of work. White space is the stepping back, the strategic pause, the oxygen that allows the sparks of our efforts to catch fire. White space has the power to radically—and simply—reinvent the way we approach work in this maxed-out, post-COVID 21st-century world. With Juliet’s memorable stories, easy-to-use tools, and razor-sharp instruction, she carves for us an escape route from the overwhelming amount of low-value tasks and the daily avalanche of e-mails, meetings, decks, and reports. Using research, client stories, and a relatable voice, Juliet shows all of us how to reclaim time for thinking and make room for what truly matters. Whether you are an individual trying to build a more sane and humane flow of daily work, a team that wants new levels of efficiency and effectiveness, or an entire organization changing your culture toward thoughtfulness, this book will lead you there.

How Adam Smith Can Change Your Life

An Unexpected Guide to Human Nature and Happiness *Penguin*

A forgotten book by one of history's greatest thinkers reveals the surprising connections between happiness, virtue, fame, and fortune. Adam Smith may have become the patron saint of capitalism after he penned his most famous work, The Wealth of Nations. But few people know that when it came to the behavior of individuals—the way we perceive ourselves, the way we treat others, and the decisions we make in pursuit of happiness—the Scottish philosopher had just as much to say. He developed his ideas on human nature in an epic, sprawling work titled The Theory of Moral Sentiments. Most economists have never read it, and for most of his life, Russ Roberts was no exception. But when he finally picked up the book by the founder of his field, he realized he’d stumbled upon what might be the greatest self-help book that almost no one has read. In How Adam Smith Can Change Your Life, Roberts examines Smith’s forgotten masterpiece, and finds a treasure trove of timeless, practical wisdom. Smith’s insights into human nature are just as relevant today as they were three hundred years ago. What does it take to be truly happy? Should we pursue fame and fortune or the respect of our friends and family? How can we make the world a better place? Smith’s unexpected answers, framed within the rich context of current events, literature, history, and pop culture, are at once profound, counterintuitive, and highly entertaining.

Same Side Selling

A Radical Approach to Break Through Sales Barriers *Ideapress Publishing - Ips*

Are you tired of playing games with your customers? The most widely used metaphors in sales are those related to sports, battle, or games. The challenge with this mindset is it requires that one person wins, and the other loses. Instead of falling victim to a win-lose approach, what if you shared a common goal with your potential client? How might things change if the client felt that you were more committed to their success than making the sale? Does it sometimes seem like you and your client are working against each other? Same Side Selling gives practical steps to break through sales barriers and turn confrontation into cooperation. Sellers that implement the Same Side Selling approach will be seen as a valuable resource, not a predatory peddler. A Different Type of Book on Selling What makes Same Side Selling different from any other book on this topic is that it is co-authored by people on both sides: a salesman (Ian) and a procurement veteran who understands how companies buy (Jack). The buyer's perspective is baked into every sentence of the book, along with the seller's point of view. Our aim is to replace the adversarial trap with a cooperative, collaborative mindset. We also want to replace the old metaphor of selling as a game. The New Metaphor: Selling Is a Puzzle Same Side Selling is the idea of solving a puzzle instead of playing a game. Discover how to sell with integrity from the same side of the table for better results all around.

Explanatory Style *Routledge*

This is the first work to condense the large literature on explanatory style -- one's tendency to offer similar sorts of explanations for different events. This cognitive variable has been related to psychopathology, physical health, achievement and success. Compiled by experts in the fields of depression, anxiety, psychoneuroimmunology and motivation, this volume details our current level of understanding, outlines gaps in our knowledge, and discusses the future directions of the field. Data from a vast number of studies are presented, including results from studies not previously reported. Coverage includes sections on cross-cultural comparisons, life-span and development issues, and gender differences; and an extensive description of the measurement of explanatory style offering questionnaire and content-analysis methods for children, college populations and adults. This work is thus a valuable tool for anyone involved in research on the etiology and treatment of depression, cognitive therapy, motivation and emotion, and the link between physical and psychological well-being.
