When you import a group into TMS, it will initially start with no users, only after a user logs into TMS will the AD group start to contain users. The "Update Groups From AD" option, only updates AD group memberships for all users that already have accounts added in TMS.

Solved: TMS not importing AD Users - Cisco Community

TMS consists of 3 parts: a database, a front-end and a few services. All of these can be checked in one single line: curl -k --ntlm --user username:password https://TMS_IP/tms/default.aspx?pageld=114. In return (if TMS is up of course), you'll get the html code of the TMS Server Maintenance page in which you can parse TMS services status.

Cisco TelePresence Management Suite (TMS) software implements a Simple Object Access Protocol (SOAP) interface that by design allows unauthenticated access to web services designed to provide management features to devices. At first publication of the advisory, the management feature was not documented and may have represented unknown risks to customers implementing the feature within their environments.
