Surveying Principles and Methods in Civil Engineering. Surveying is the process of determining relative positions of different objects on the surface of the earth by measuring horizontal distances between them and preparing a map to any suitable scale. Measurements are taken in horizontal plane only. Surveying is the art of determining the relative positions of points on, above or beneath the surface of the earth by means of direct or indirect measurements of

distance, direction and elevation.

Principles and Methods of Surveying in Civil Engineering ...

2 • Surveying has to do with the determination of the relative spatial location of points on or near the surface of the earth. • It is the art of measuring horizontal and vertical distances between objects, of measuring angles between lines, of determining the direction of lines, and of establishing points by predetermined angular and linear measurements.
