CIMA - Assessment

Students will often find that tests become more challenging when they

advance from one grade to the next, and sometimes when they move from one teacher to another. This sometimes happens because the test questions they encounter move from objective-type questions to subjective-type questions.

Best Practices for Subjective Test Questions

Objective tests are measures in which responses maximize objectivity, in the sense that response options are structured such that examinees have only a limited set of options (e.g. Likert scale, true or false). Structuring a measure in this way is intended to minimize subjectivity or bias on the part of the individual administering the measure so that administering and interpreting the results does not rely on

the judgment of the examiner.
