Biomechanics and Neural Control of Movement. In June 2016, 148 biologists, engineers, clinicians, kinesiologists, neuroscientists, and physiologists gathered in Sterling, OH, at the Deer Creek Lodge and Conference Center. They were there to attend a scientific meeting: Biomechanics and Neural Control of Movement 2016.

This book arose from the Ninth Engineering Foundation Conference on Biomechanics and Neural Control of Movement, held in Deer Creek, Ohio, in June 1996. This unique conference, which has met every 2 to 4 years since the late 1960s, is well known for its informal format that

promotes high-level, up-to-date discussions on the key issues in the field.

Biomechanics and Neural Control of Posture and Movement ...

Abstract. The mechanics, morphometry, and geometry of our joints, segments, and muscles are fundamental biomechanical properties intrinsic to human neural control. The goal of our study was to investigate whether the biomechanical actions of individual neck muscles predict their neural control. Specifically, we compared the moment direction and variability produced by electrical stimulation of a neck muscle (biomechanics) to the preferred

activation direction and variability (neural control).

Our findings show that the neural control of neck muscles is not based solely on optimizing individual muscle biomechanics but, as activation

increases, biomechanical constraints in part dictate the activation of synergistic neck muscles. NEW & NOTEWORTHY Biomechanics are an intrinsic part of human neural control. In this study, we found that the biomechanics of individual neck muscles cannot fully predict their neural control.

Biomechanics is the scientific discipline that studies biological systems, such as the human body, using the methods of Mechanical Engineering. The purpose is to create new and innovative approaches, advance fundamental concepts,

and apply knowledge to the improvement of the mechanics of biological systems. While biomechanics represents a broad area of research, from the design of dental implants to the understanding of fluid dynamics in the vascular system, the biomechanics research focus ...
