Fanuc 11T parameters Hi Guys, Mori Seiki SL3, Fanuc 11T. Service man did some work (I wasn't there), and as far as I was told the machine was running when he left. Now, when powered up, we got the IPL screen. Went through the intialization process, which erases the bubble memory, and got it to reboot. Now we need to read parameters back in. I have a file, so that's not the problem. Set the ...

Fanuc 11T parameters - Practical Machinist

Fanuc understandably was not willing to put much effort into digging up information for a 30+ year old control. They did have tested exchange boards ready to ship if needed. Price of course is quite high and likely more than the true value of the machine. Machine owner sourced a reasonably priced replacement main board from a machine being scrapped. I installed it and all is good again ...

What is FANUC Alarm 401? Alarm 401 is a very generic alarm. It simply means that the servo's did not obey. The CNC, which is in charge of the servos, tells the servo drives to turn on and remain on. If for whatever reason the servo drive turns itself off without the permission from the CNC, the CNC will generate a 401 alarm. This alarm will usually occur with other alarms, such as the 414 ...
