The Multicore Association was founded in 2005. Multicore Association is a member-funded, non-profit, industry consortium focused on the creation of open standard APIs, specifications, and guidelines that allow system developers and programmers to more readily adopt multicore technology into their applications. The consortium provides a neutral forum for vendors and developers who are interested in, working with, and/or proliferating multicore-related products, including processors, infrastructure

Multicore embedded systems are rapidly emerging. Hardware designers are packing more and more features into their design. Introducing heterogeneity in these systems, i.e., adding cores of varying types, provides opportunities to solve problems in different aspects. However, those designs present several challenges to embedded
