Housing matters to economic development. It can enhance economic performance and place competitiveness, but it can also lead to segregation and

spatial concentrations of poverty. Too often, however, housing investment has taken place in isolation from the wider economic context.

Housing and economic development - Centre for Cities

Urban economics is broadly the economic study of urban areas; as such, it involves using the tools of economics to analyze urban issues such as crime, education, public transit, housing, and local government finance. More specifically, it is a branch of microeconomics that studies urban spatial structure and the location of households and firms. Much urban economic analysis relies on a particular model of urban spatial structure, the monocentric city model pioneered in the 1960s by William Alonso
