Updated July 03, 2019. In many areas of language study, such as structural linguistics, markedness is a state in which one linguistic element is more distinctively identified (or marked) than another (unmarked) element. As Geoffrey Leech observed, "Where there is a contrast between two or more members of a category such as a number, case, or tense, one of them is called 'marked' if it contains some extra affix, as opposed to the 'unmarked' member which does not."

Markedness and Language Change: The Romani Sample: Elsik ...

Markedness is a central concept in the study of linguistics in the 20th and 21st centuries, and it can be traced back to the early developments of structuralist phonological theory. However, during the course of the 20th century it has

acquired so many different meanings and uses that its current usage is still much debated and not clearly defined.

Markedness and Language Change: The Romani Sample ...

In linguistics and social sciences, markedness is the state of standing out as unusual or divergent in comparison to a more common or regular form. In a marked-unmarked relation, one term of an opposition is the broader, dominant one. The dominant default or minimum-effort form is known as unmarked; the other, secondary one is marked. In other words, markedness involves the characterization ...
