Solve Equations with Absolute Value

Some absolute value equations have variables both sides of the equation. However, that will not change the steps we're going to follow to solve the problem as the example below shows: Solve the following absolute value equation: $|5x + 20| = 80$. Solve the following absolute value equation: $|x| + 3 = 2x$.

Absolute Value Equations: How to solve absolute value ...

Solve $|x - 3| = |3x + 2| - 1$. The first absolute-value expression, in the left-hand side of the equation, is positive when the argument is positive. I'll solve to find that interval: $x - 3 > 0$. $x > 3$. The argument of this absolute value will be negative before the breakpoint (at $x = 3$) and positive after.

Solving Absolute-Value Equations: A Special Case | Purplemath

For most absolute value equations, you will write two different equations to solve. The value inside of the absolute value can be positive or negative. If the answer to an absolute value equation is negative, then the answer is the empty set. No absolute value can be a negative number.

How to Solve an Absolute Value Equation

an absolute value equation is: Answer by ikleyn(34919) (Show Source): You can put this solution on YOUR website!. The simplest possible equation is $|x - 2| = 8$. Notice that the number 2 is exactly half-way between the points "-6" and "10" on the number line: it is a midpoint, or a bisector of the segment $[-6, 10]$. The number "8" in the ...

An absolute value equation is any equation that contains an absolute value expression. The absolute value of a variable is denoted as $| |$, and it is always positive, except for zero, which is neither positive nor negative. An absolute value equation is solved using the same rules as any other algebraic equation; however, this type of equation has two potential results, derived from a positive ...

The output values of the absolute value are equal to 4 at $x = 1$ and $x = 9$. The graph of f is below the graph of g on $1 < x < 9$. This means the output values of $f(x)$ are less than the output values of $g(x)$. The absolute value is less than or equal to 4 between these two points, when $1 \leq x \leq 9$.

Absolute Value Equation That Has No Solutions

The absolute value function is horizontally shifted left 2 units, is vertically flipped, and vertically shifted up 3 units. Answer. $f(x) = -|x + 2| + 3$. The graph of an absolute value function will have a vertical intercept when the input is zero.

2.5: Absolute Value Functions - Mathematics LibreTexts

The absolute value of any number is either positive or zero. But this equation suggests that there is a number that its absolute value is negative. Can you think

of any numbers that can make the equation true? Well, there is none.

Solving Absolute Value Equations - ChiliMath

Absolute value describes the magnitude of a number or the distance between points, but it strips out information on the sign of the number or the direction of the distance. A positive absolute value could represent either a positive or a negative original value. When we simplify or solve equations that include absolute value expressions, we must consider both possibilities.

Absolute Value Equations - NROC

More Formal. More formally we have: Which says the absolute value of x equals: x when x is greater than zero; 0 when x equals 0 $-x$ when x is less than zero (this "flips" the number back to positive); So when a number is positive or zero we leave it alone, when it is negative we change it to positive using $-x$.

Absolute Value in Algebra - MATH

Section 2-14 : Absolute Value Equations. In the final two sections of this chapter we want to discuss solving equations and inequalities that contain absolute values. We will look at equations with absolute value in them in this section and we'll look at inequalities in the next section.

Algebra - Absolute Value Equations - Lamar University

The absolute value function is commonly thought of as providing the distance the number is from zero on a number line. Algebraically, for whatever the input value is, the output is the value without regard to sign. A General Note: Absolute Value Function The absolute value

function can be defined as a piecewise function

Absolute Value Functions | Precalculus I

But another, I guess simpler way to think of it, it always results in the positive

version of the number. The absolute value of negative 7,346 is equal to 7,346. So with that in mind, let's try to solve some equations with absolute values in them. So let's say I have the equation the absolute value of x minus 5 is equal to 10.
