The Shipping Container Homes Book

A Shipping Container House Plans to Building an Environmentally Friendly Home, Plus Tips, and Design Ideas to Get You Started *Kenelm Hunt*

A Comprehensive Guide To Build An Environmentally Friendly Home With Shipping Containers Container homes are just what they sound like; homes built from container steel that

transports goods on ships, trains, and trucks. From this container steel, homes of all shapes and sizes can be built. Shipping containers are used to construct homes, cabins, studios, and offices because with about 14 million 'out-of-service' containers worldwide, several of such containers are available for these purposes, not to mention the appeal that comes with experimenting with these giant blocks of containers. Aside from trendiness, building container homes have gained a wider interest amongst many because it saves money to construct. As such, several potential homeowners are seeking for homes with lesser construction and maintenance costs.

Besides, the perception exists that container homes contribute to recycling initiatives. Containers come in different sizes, such as 10ft, 20ft, and 40ft, with the smallest shipping container providing a floor space of about 100 square feet for a shipping container home. Now imagine when hundreds of micro-apartments made of containers are constructed into a huge apartment building; the sight of such can be an astonishing grab for the eye. But you really don't need to rack up several containers before you can have a decent container home to live in. All you need is the right amount of knowledge and guidance to help you get the best out of your

shipping container and have a well-put-together container you can call home. Hence, the reason this book was written. In this book, you will;

1. Be familiar with the pros and cons of owning a shipping container home to help you make an informed decision.
2. Have access to different container layout plans to help you get the most out of your container home.
3. Know how to choose the right shipping container for your home using several deciding criteria.
4. Be educated on how to prepare the site and foundation for your container properly.
5. Know what container insulation entails and how it affects your container home.
6. Know the different

roofing styles applicable to container homes with directions on how to floor your container home.

7. Be familiar with several design ideas you can implement to give your home an astonishing feel while conserving space. ...and so much more! Still having doubt this is your go-to guide to building a shipping container home? Get a copy of this book RIGHT NOW to find out

How to Build a Shipping Container Home You Can Actually Live In!

Anyone can build a shipping container home for \$500,000. I wanted to build a 1,600SF, three bedroom, three bathroom home for \$99,000 or LESS! This is the book I was looking for when I first started using shipping containers for business and home. The ones I found were poorly written, edited and thrown together. All of them lacked a clear strategy to practically build something from the ground up. I combined my

background of 20 years in asset management experience, university teaching/research, building a traditional home, and my current work converting shopping container into farms into this book. You can build the home of your dreams and be well on your way to living mortgage today!

This book has been inspired since shipping container homes have become a hot trend in home building over the last few years. Performing a simple internet search for "shipping container home" will demonstrate to you just how interested people are in building shipping container homes. This popularity can be attributed to several different reasons. What a Shipping Container Home Is As the name implies, a shipping container home is a house that is actually built using a shipping container/ shipping

containers as the frame of the house. That's right, people are actually using steel containers used to ship cargo as the building blocks of their homes, and more and more people are turning to this option. Have you ever wondered why? Here are just a few benefits of building a shipping container home that this book will go to a great extent to highlight.* Cost-Building a shipping container home can save you almost 50% of the cost of building a traditional, wooden-framed house (if you do it right). * Going green-Re-using shipping containers is a way of befriending the environment. There are literally millions of used shipping containers that are

clogging up shipping ports all over the world while serving no purpose and taking up space. This vast amount of steel can be repurposed to make a cheap, durable housing frame that benefits the environment.* More durable than traditionally framed houses-Shipping containers are meant to be tough and resist the effects of the elements. Steel cargo boxes can withstand hurricane and tornado force winds. They are resistant to fire and mold. With a shipping container frame, you don't have to worry about termites. * Easy to build-With the proper design and building plan, you can quickly build your home in as little as 90 days. Making the right choices when planning

transportation of your shipping container can cut costs and save time. * Simple transportation options-Getting the shipping container to your home can be easy process once you know how.
