International Environmental Law and World Order: A Problem ...

International Environmental Law (IEL) is concerned with the attempt to control pollution and the depletion of natural resources within a framework of sustainable development. It is a branch of public international law - a body of law created by states for states to govern problems that arise between states.

International Environmental Law - Public International Law ...

International environmental law
International environmental law (sometimes, international ecological law) is a field of international law regulating the behavior of states and international organizations with respect to the environment. See Phillipe Sands, *Principles of International Environmental Law* (2nd ed., Cambridge, 2003).

International environmental law | Wex | US Law | LII ...

International Environmental Law
Introduction. International environmental law is a body of international law concerned with protecting the environment, primarily through bilateral and multilateral international agreements. International environmental law developed as a subset of international law in the mid-twentieth century. Although conservation movements developed in many nations in the nineteenth century, these movements typically only addressed environmental concerns within a single nation.

International Environmental Law | Encyclopedia.com

The International Council of Environmental Law (ICEL) is the world's first, and oldest, organization of eminent

jurists dedicated to the field of environmental law. ICEL has, for five decades, played a unique role in the creation of international environmental law and establishing the juridical foundation for many aspects of sustainable development.

ICEL - ICEL

The World Commission on Environmental Law (WCEL) advances environmental law around the globe by providing specialized knowledge and assistance to strengthen the legal foundations of the conservation of nature and sustainable development through the conceptual advancement of environmental principles, norms, and laws, and by building the capacity of communities to benefit from the environmental rule of law.

Environmental law | Britannica

A general overview of the principles of international environmental law is best approached with a certain degree of

caution. First, international environmental law principles can hardly be dissociated from the politically sensitive and complex issues surrounding the notion of sustainable development.

Principles of International Environmental Law: an Overview

Environmental law, or sometimes known as environmental and natural resources law, is a term used to explain regulations, statutes, local, national and international legislation, and treaties designed to protect the environment from damage and to explain the legal consequences of such damage towards governments or private entities or individuals (1).

Environmental Law: Government and Public Policy Towards ...

Book description. This book analyzes the law and policy for the management of global common resources. As competing demands on the global commons are increasing, the protection of environment and the pursuit of growth give rise to all sorts of conflicts. It also analyzes issues in the protection of the global commons from a fairness, effectiveness and world order perspective.

International Environmental Law - Cambridge Core

Several hundred international environmental agreements exist but most link only a limited number of countries. These bilateral or sometimes trilateral agreements are only binding for the countries that have ratified them but are nevertheless essential in the international environmental regime.

It is a key international actor in the Corona crisis: the World Health Organization (WHO) based in Geneva. In a recent article on the role of international law in dealing with the SARS-CoV-2 ...

International law in the time of the coronavirus

The increased participation by third-world nations in legislating and implementing international environmental law should proceed from the principles listed in the Declaration on the Human Environment of 1972. 30 Among those principles the following are especially important: the international cooperation principle; the state equality

principle; as well as the principle of special assistance to developing countries in financing and transferring technology.

The status of third-world states in international ...

Environmental law is a collective term encompassing aspects of the law that provide protection to the environment. A related but distinct set of regulatory regimes, now strongly influenced by environmental legal principles, focus on the management of specific natural resources, such as forests, minerals, or fisheries. Other areas, such as environmental impact assessment, may not fit neatly into either category, but are nonetheless important components of environmental law.

Environmental law - Wikipedia

The vastness of this area of international law includes the environmental sub-issues of population, biodiversity, global climate change, ozone depletion, preserving the Antarctic regions, movement of toxic and hazardous substances, land or vessel-based pollution, dumping, conservation of marine living resources, trans-boundary air and water pollution, desertification, and nuclear damage, among others.
