 by a five-year warranty.

201 Series Dryers

The Ultra Air 201 Series Refrigerated Air Dryer is a constantly
 running, non-cycling type with a hermetic type refrigeration
 compressor and is available with a water cooled or air cooled

condenser. The following are the five phases that take place in the drying process: Phase 1 - Precooling

A Division of Numatics - Cole-Parmer

The FLEX Series refrigerated compressed air dryer utilizes a phase change material to what absorbs latent heat and is released within the materials phase change process. This attribute allows the phase change material to draw in heat from warm, moisture-rich compressed air with no significant change in temperature.

Amazon.com: Refrigerated Air Dryer

A refrigerated air dryer chills the compressed air to 33 – 40 degrees Fahrenheit at which water vapor is condensed into a liquid and is then expelled from the system via a water-trap and automatic drain. The cool dry air then is typically re-heated to around room temperature before exiting the dryer and going to

your production lines.
