Continuous and discontinuous variation. Some of the features of the different organisms in a species show continuous variation, and some features show discontinuous variation.

Continuous and discontinuous variation - Variation - KS3 ...

The main difference between continuous and discontinuous variation is that continuous variation shows an unbroken range of phenotypes of a particular character in the population whereas discontinuous variation shows two or more separate forms of a character in the population. Furthermore, the presence of many genes for the determination of a particular trait causes continuous variation while one or few genes are responsible for the discontinuous variation.
