The Radiology

Assistant : Anatomy 2.0

The temporal bone (latin: os temporale) is a paired bone situated at the lateral side and base of the skull. The temporal bone features important structures of the vestibulocochlear apparatus, including the external acoustic meatus, the tympanic cavity and the structures of the inner ear.

Temporal bone - Anatomy

Temporal bone anatomy. The temporal bone is a paired symmetrical bone

which forms the lower lateral walls of the human skull. It is a composite structure consisting of four parts, each ossifying independently and later fuses. The temporal, parietal and frontal bones together forms the pterion, which is the weakest part of the skull.
