How to Tame a Fox (and Build a Dog)

Visionary Scientists and a Siberian Tale of Jump-Started Evolution *University of Chicago Press*

In 1959, biologists Dmitri Belyaev and Lyudmila Trut set out to speed up thousands of years of evolution into a few decades. They started with a few dozen silver foxes from fox farms in the USSR and attempting to recreate the evolution of wolves into dogs in real time in order to witness the process of domestication. Within a decade the experiments had resulted in puppy-like foxes with floppy ears, piebald spots, and curly tails. Along with these physical changes came genetic and behavioral changes, as well. Dugatkin and Trut examine the adventure, science, politics, and love behind it all.

Stuff You Should Know

An Incomplete Compendium of Mostly Interesting Things *Flatiron Books*

From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there's something interesting about everything (...except maybe jackhammers).

Human Physiology

The Hidden World of the Fox *HarperCollins*

Discover the hidden world of the fox, as beautifully revealed by an acclaimed ecologist who has studied foxes for two decades across four continents “An ode to this familiar yet mysterious creature. ... The sight of foxes can lift Brand's prose into poetry. ... By turns lyrical, salty, funny and scholarly.” —New York Times Book Review The fox. For thousands of years myth and folklore have celebrated its cunning intelligence. Today the red fox is the nature's most populous carnivore, its dancing orange tail a common sight in backyards. Yet who is this wild neighbor, truly? How do we negotiate this uneasy new chapter of an ancient relationship? Join British ecologist Adele Brand on a journey to discover the surprising secrets of the fabled fox, the familiar yet enigmatic creature that has adapted to the human world with astonishing—some say, unsettling—success. Brand has studied foxes for twenty years across four continents—from the Yucatán rainforest to India's remote Thar Desert, from subarctic Canada to metropolitan London. Her observations have convinced her that the fox is arguably the most modern of all wildlife, uniquely suited to survival in the rapidly expanding urban/wild interface. Blending cutting-edge science, cultural anthropology, and intimate personal storytelling drawn from her own remarkable fieldwork, *The Hidden World of the Fox* is Brand's rich and revelatory portrait of the extraordinary animal she has devoted her life to understanding.

Handbook of School-Family Partnerships *Routledge*

Family-school partnerships are increasingly touted as a means of improving both student and school improvement. This recognition has led to an increase in policies and initiatives that offer the following benefits: improved communication between parents and educators; home and school goals that are mutually supportive and shared; better understanding of the complexities impinging on children's development; and pooling of family and school resources to find and implement solutions to shared goals. This is the first comprehensive review of what is known about the effects of home-school partnerships on student and school achievement. It provides a brief history of home-school partnerships, presents evidence-based practices for working with families across developmental stages, and provides an agenda for future research and policy. Key features include: provides comprehensive, cross-disciplinary coverage of theoretical issues and research concerning family-school partnerships. describes those aspects of school-family partnerships that have been adequately researched and promotes their implementation as evidence-based interventions. charts

cutting-edge research agendas & methods for exploring school-family partnerships. charts the implications such research has for training, policy and practice especially regarding educational disparities. This book is appropriate for researchers, instructors, and graduate students in the following areas: school counseling, school psychology, educational psychology, school leadership, special education, and school social work. It is also appropriate for the academic libraries serving these audiences.
