We have this problem with an Okuma LB15 (OSP5000) lathe, any advice would be much appreciated. - On start-up the machine often boots to the main screen but with Alarm 201. The Okuma manual describes this as a possible BDU fault or a Servo PSU fault.-Also, immediately at mains power-on, the Z-axis drive shows red LV LED. (is this normal?)

**Okuma LB15 (OSP5000) lathe drive fault - Practical Machinist**

If you have any questions leave a comment Thanks..
