Philosophy of science is a branch of philosophy concerned with the foundations, methods, and implications of science. The central questions of this study concern what qualifies as science, the reliability of scientific theories, and the ultimate purpose of science. This discipline overlaps with metaphysics, ontology, and epistemology, for example, when it explores the relationship between ...

Philosophy of science - Wikipedia

Philosophy and science share the tools of logic, conceptual analysis, and rigorous argumentation. Yet philosophers can operate these tools with degrees of thoroughness, freedom, and theoretical abstraction that practicing researchers often cannot afford in their daily activities.

Philosophy of Science: The Key Thinkers: Brown, James ...

In 1977, Brown argued an intellectual revolution in philosophy that emphasized that the history of science was replacing formal logic as the major analytical tool in the philosophy of science. One of the major perspectives in the new philosophy emphasized science as a process of continuing research rather than as a product focused on findings.
