Infrared heat for food and beverage processing. Processing chocolate, filling candies, pre-browning instant meals or heating surfaces of foods: exact temperatures that avoid overheating of the food are required in the food processing industry. Infrared emitters transmit heat without contact and only as long as necessary. Without preheating, and using energy efficiently, heat is delivered exactly when it is needed.

### **Infrared heat for food and beverage processing**

**Infrared Heat in Food Processing Applications** The food processing industry benefits greatly from infrared technology. Infrared systems have found use in a number of areas. For food industries, infrared modules are manufactured in stainless steel and fitted with a wire mesh to afford mechanical protection.

### **Infrared Heat in Food Processing Applications**

Infrared (IR) heating offers many advantages over conventional heating under similar conditions, which include reduced heating time, uniform heating, reduced quality losses, versatile, simple and compact equipment, and significant energy saving.
