Anaerobic Reactors Biological Wastewater Treatment

Anaerobic treatments on wastewater are normally implemented when treating more concentrated wastewater. The anaerobic sludge contains various groups of micro organisms that work together to eventually convert organic material to biogas via hydrolysis and acidification. Biogas typically consists of 70% methane (CH₄) and 30% carbon dioxide (CO₂) with residual fractions of other gases (e.g. H₂ and H₂S).

Anaerobic Biological Wastewater Treatment | EMIS

Anaerobic wastewater treatment is a type of biological treatment where anaerobic microorganisms are used to break down and remove organic contaminants from wastewater. While anaerobic treatment systems may take a variety of forms, they generally include some form of bioreactor or repository capable of maintaining the oxygen-free environment needed to support the process of anaerobic digestion.

What Is Anaerobic Wastewater Treatment and How Does It Work?

Anaerobic sludge blanket reactors are a different sort of anaerobic treatment where the wastewater flows through suspended sludge particles known as a “blanket”. The anaerobes in the sludge digest the organic components in the water which then collect as granules at the base of the reactor tank.

Anaerobic Reactors Used for Waste Water Treatment ...

Biological wastewater treatment (anaerobic and aerobic digestion reactors) takes advantage of the ability of certain microorganisms (including bacteria) to assimilate organic matter and nutrients dissolved in the water for their own growth, thus removing soluble components in the water. Soluble organic matter is assimilated by microorganisms as a carbon source.

Aerobic digestion reactors for biological wastewater treatment

Biological wastewater treatment is designed to degrade pollutants dissolved in effluents by the action of microorganisms. The microorganisms utilize these substances to live and reproduce. Pollutants are used as nutrients. A prerequisite for such degradation activity, however, is that the pollutants are soluble in water and nontoxic.

Biological Wastewater Treatment - an overview ...

Recently, anaerobic MBRs have seen successful full-scale application to the treatment of some types of industrial wastewaters—typically high-strength wastes. Example applications include the treatment of alcohol stillage wastewater in Japan [20] and the treatment of salad dressing/barbecue sauce wastewater in the United States.
