Mastering Networks An Internet Lab Manual [EBOOK]

Mastering, a form of audio post production, is the process of
preparing and transferring recorded audio from a source
containing the final mix to a data storage device (the master),
the source from which all copies will be produced (via methods
such as pressing, duplication or replication).In recent years digital
masters have become usual, although analog masters—such as
audio tapes—are ...

Mastering (audio) - Wikipedia

Bad Networks. An Internet network can be modeled using a
directed graph $G = (V, E)$: The set of nodes V consists of one
node for every server in the network and there is an edge $(u,v) \in E$
if and only if there is a direct link from server u to server v .Any
server within a strongly connected component can send and
receive packets to and from any server within the same strongly
connected component.
