I have a Kenmore elite fridge, that isn't cooling. It's a little over a year old, shouldn't be anything major. Called local repair guy, paid a \$30 service call, said was out of freon. I ordered bullet piercing value and got can stop leak with freon.

SOLVED: Kenmore elite frige not cooling - Refrigerator ...

My Kenmore refrigerator will get cool but not cold. It is a bottom mount that after 12 hrs with a cup of water in the freezer it is just now freezing on the top of the cup. I vacuumed the coils best I could and confirmed the fan in back is working.

My Kenmore refrigerator will get cool but not cold. It is ...

The freezer... My Kenmore Refrigerator will not cool anymore. The freezer works fine, but it will not cool. I have it on level 6 now.

My Kenmore Refrigerator will not cool anymore. The freezer ...

If you have allowed the proper time and the freezer is not freezing but the fridge is cooling, then you may have an issue with ice on the coils or a build up of ice in the freezer section. The power outage let the ice melt and when power was returned the water may have froze and this is what is causing your issue.

Refrigerator Is Not Cooling - What To Check And How To Fix

Since there was a frost pattern on the evaporator, this indicates that the sealed system (compressor and refrigerant) are working properly. The lack of cooling is apparently caused by a lack of proper air circulation at this point. If that evaporator fan is not working or the air circulation is blocked, then the refrigerator will not cool.

kenmore elite refrigerator is running but will not cool ...

The evaporator fan motor draws cold air over the evaporator coils and circulates it throughout the freezer. If the evaporator fan is not working, the freezer or refrigerator will not cool adequately. To determine if the evaporator fan motor is defective, try turning the fan blade by hand. If the fan blade does not turn freely, replace the fan motor.

Kenmore Refrigerator - Refrigerator Freezer Is Cold But ...

Vacuum the coils under or behind the fridge. Clogged coils can cause poor cooling. Check to make sure nothing is stuck in the condenser fan and that it spins freely (models with coils on the back won't have a fan). To do this, unplug the fridge and pull it out. Clean the fan blades and spin the fan by hand to see if it's stuck.

Refrigerator Not Cooling: Fix Refrigerator Problems (DIY ...

You should be able to open the refrigerator door and find a hole in the bottom of the control box (Key 1) where you can insert a small screw driver and manually advance the defrost timer. Hold the refrigerator door open for long enough so that the compressor starts if it is not already running (based on your cooling problems, I assume that the compressor will already be running).
